

Physical security

We assess your facility and design its protection independently of any manufacturer's catalogue.

Current-state audit

We review facilities, measures, procedures and documentation to identify vulnerabilities and priorities.

Strategic security plan

We define objectives, measures, phases and investment priorities for your assets and operations.

CCTV, intrusion and access

We design coverage, perimeter and indoor detection, and access architecture.

Grade 2 and Grade 3 alignment

We document alarm-system requirements according to risk and the applicable framework, including Order INT/316/2011.

Tender specifications

We prepare scope, quantities, requirements and criteria to compare bids on the same technical basis.

What you receive

Technical design with specifications, drawings, quantities and tender documents; audit and strategic plan according to the agreed scope.

Who implements it

The authorised installation company selected by the client. The same design can be tendered to several companies.

What is excluded

Equipment supply, installation, maintenance, guarding or certification issued by the installer.
